Updated Oct 2025

OVERVIEW

With a background in architecture and a foundation in computational geometry, I worked as a software engineer at a PropTech startup, developing geometry processing, spatial data pipelines, and machine learning applications for architectural design. I have built design exploration engines for apartment design feasibility analysis, small housing design exploration, and LLM-based office layout generation, bridging architecture with computational methods.

WORK EXPERIENCE

Software Engineer @ Spacewalk

Jan 2022 - Present

At Spacewalk, I worked as a software engineer, conducting research and development to productionize geometric algorithms for deployment in real-world applications. My contributions included developing *PlanNext*, an LLM-based office layout automation engine; rebuilding *LBDeveloper*, an apartment placement and feasibility analysis service; and advancing and maintaining *Landbook*, a platform for small housing planning exploration. Also, I created Rhino Grasshopper plugins to support in-house architects at BOUNDLESS Architects.

Architectural Design Intern @ S.E.A Architects

Jun 2019 – Jul 2019

I worked as an architectural design intern, supporting design development through drawings and visualizations, conducting site analysis and feasibility studies, and contributing to competitions with concept and schematic design proposals.

SKILLS

Machine Learning: Python, PyTorch, TorchGeometric, HuggingFace **Geometry:** Shapely, Three.js, Rhino, Grasshopper, AutoCAD **Frontend:** Javascript, Typescript **Database:** PostgreSQL, PostGIS **DevOps:** AWS S3, EC2, ECR, Docker, Github Actions **Collaboration:** Git, Github, JIRA, Slack **API Development:** FastAPI, Flask

EDUCATION

Korea National Open University

Bachelor of Computer Science - BCS

3rd Year Transfer

Mar 2025 - Present

Korea National University of Transportation

Bachelor of Architecture - BArch

GPA: 3.84 / 4.50

Mar 2013 - Feb 2021

CERTIFICATION

ENCORE Playdata

Project-Based Training Program for Data Scientists

Certificate of Completion

May 2021 - Nov 2021

Chiangmai University

International Urban Regeneration Workshop

Certificate of Completion

Dec 2018

Korea Institute of Construction Technology Education

Building Information Modeling Professional Course

Certificate of Completion

Dec 2020 - Mar 2021

AWARDS

Korea Iron & Steel Association

Steel Modular Architecture Competition
Encouragement Award
Nov 2020

Architectural Institute of Korea

Academic Presentation Conference
Excellence Prize
Nov 2020

Korea National University of Transportation

Graduation Exhibition
Grand Prize (3rd)
Jun 2020

The Korean Institute of Culture Architecture

Next Generation Cultural Space Competition
Special Selection
Nov 2019

Korea Railroad (KORAIL)

Korea Railroad Architecture Competition
Grand Prize (2nd)
Oct 2019
