Updated Jun 2026

SUMMARY

Software Engineer and Computational Designer with a background in architecture and computer science, specializing in generative design. Experienced in developing spatial data systems and machine learning applications for design automation.

EXPERIENCE

Software Engineer @ aaro **Mar 2026 – Present**

Working in collaboration with *neoBIM* on the development of a generative design and automation product for architectural planning and feasibility analysis based on German building regulations and planning codes.

Research Intern @ Visual Media Lab, KAIST **Dec 2025 – Feb 2026**

Contributed to the development of a multimodal virtual space automation system funded by KOCCA, focusing on converting interior image inputs into coherent 3D scenes using models for image-to-3D reconstruction, object detection, and semantic segmentation.

Software Engineer @ Spacewalk **Jan 2022 – Nov 2025**

Conducted research and development to productionize geometric algorithms for architectural planning and feasibility analysis. Developed computational design systems that translate spatial constraints, planning requirements, and geometric conditions into workflows for office layout automation, apartment placement, housing feasibility studies, and mass-planning.

Design Intern @ SANGJI Architects **Jun 2019 – Jul 2019**

Supported architectural design development through drawings, 3D visualizations, site analysis, and mass studies. Assisted with competition proposals from concept development to schematic design.

Research Intern @ DART lab, KNUT **Mar 2018 – Apr 2019**

Assisted with architectural and urban design studies, developing parametric 3D models using Rhino and Grasshopper.

EDUCATION

Korea National Open University **Mar 2025 – Present**

Bachelor of Science in Computer Science

Korea National University of Transportation **Mar 2013 - Feb 2021**

Bachelor of Architecture

CERTIFICATIONS

en-core PLAYDATA	May 2021 - Nov 2021
Project-Based Training Program for Data Scientists	
Korea Institute of Construction Technology Education	Dec 2020 - Mar 2021
Building Information Modeling Professional Course	
SAMOO Architects & Engineers	Aug 2020
SAMOO Design Workshop (SDW 2020)	
Chiangmai University	Dec 2018
International Urban Regeneration Workshop	

AWARDS

Korea Iron & Steel Association	Nov 2020
Steel Modular Architecture Competition	Encouragement Prize
Architectural Institute of Korea	Nov 2020
Academic Presentation Conference	Excellence Prize
Korea National University of Transportation	Jun 2020
Graduation Exhibition	Grand Prize (3 rd)
The Korean Institute of Culture Architecture	Nov 2019
Next Generation Cultural Space Competition	Special Selection
Korea Railroad (KORAIL)	Oct 2019
Korea Railroad Architecture Competition	Grand Prize (2 nd)
